

**INDUSTRY-LEADING SPECIALTY VEHICLE AND
MOBILE TECHNOLOGY INTEGRATION SOLUTIONS**

ABOUT US

TechOps Specialty Vehicles (TechOps) is an American business that specializes in the design and production of a wide variety of mobile vehicle-based solutions; from a full suite of law enforcement vehicles to emergency response and public safety, to mobile medical, bookmobile and community outreach, and fire/EMS. Since 2006, TechOps has been providing specialty vehicles for U.S. Government agencies, State and Local departments, as well as private customers and businesses across the nation.

Headquartered in Stevensville, Maryland, with a sales location in Denver, Colorado, TechOps approaches every project with a focus on partnering with our customers in order to provide a designed solution that meets the mission at hand. Whether the project is complex or simple, our commitment to the customer is what drives us.

TechOps operates a 19,000 sqft production facility that incorporates administrative offices, an environmentally-controlled design and engineering suite, a custom carpentry shop, all component inventory, as well as fabrication capabilities. The facility is fully operational and is capable of all engineering and building needs for TechOps products, including technology and vehicular-based solutions.

At TechOps, our team of industry professionals and craftsman take great pride in the track record we maintain in supporting numerous customers with prototypes, one-off operational solutions, as well as fleet builds. We immerse ourselves in the mission of every project and provide our customers with 100% in-house designed and built solutions that are of the highest quality seen in the specialty vehicle industry.

- Winnebago

PARTNER WITH AN INNOVATIVE TEAM

Our team strives to build the best quality vehicles and works together with you through the entire process. TechOps is your trusted resource in specialty vehicles.

FIRE | RESCUE | EMS

Complimenting your fleet of pumpers, trucks, rescues, and ambulances with quick response vehicles. From battalion chiefs to first responders, TechOps can design to your needs so you can focus on responding to the needs of others.

BUILT TO ENDURE, BUILT TO LAST

In the most severe operational conditions TechOps units are engineered to outperform the elements.

MARKETING

Trust the professionals at TechOps to design and create a unique experiential vehicle to market your product and represent your brand. With a variety of base vehicles to choose from, our talented design team, and a long history of technology integration, our custom mobile marketing platforms have endless options.

Capabilities

- Custom design of full vehicle and interior/exterior components
- Professional A/V and technology integration
- Interior and exterior conversion work
- and fabrication
- Integrated mobile power and climate control
- Vehicle wrap

Chassis Options

- Winnebago
- Step Vans (Freightliner & Ford)
- Vans – Sprinter, Transit, ProMaster
- SUVs
- Truck with Bodies
- Trailers

REPRESENT YOUR BRAND IN A CUSTOM AND UNIQUE WAY

When you bring a professional experience to your customers, they are left with a forever impression.

RETROFITS | UPGRADES

Older trucks with lower mileage are often prime candidates for retrofits and upgrades. Whether fixing a multitude of broken components, replacing outdated interior finishes, or upgrading your entire technology suite, your vehicle can feel brand new. Additionally, retrofits are less expensive and you avoid the new vehicle purchasing process.

GETTING YOUR FLEET ASSETS BACK UP TO PEAK OPERATING CONDITIONS

OTHER SPECIALTY

For operational needs of any kind TechOps builds vehicles of any size, scope, or platform. From bomb disposal units to mobile LiDAR survey vans to demonstration vehicles to business continuity solutions.

WHATEVER YOUR MISSION, TECHOPS HAS DONE IT ALL

We are here to design and build a solution based on your concept of operations.

CUSTOM | SME SERVICES

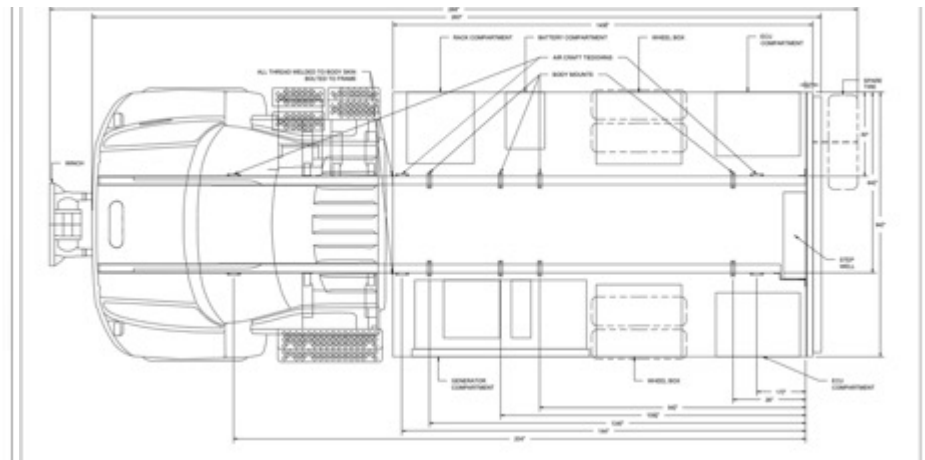

TechOps offers a full suite of engineering services for the specialty vehicle market. If you haven't found it, our talented and experienced engineering team can design it, and we can build it. Ideas are what we are made of! In addition, TechOps offers design, consultation, and specialty vehicle inspection services.

Technical Capabilities

- 2D and 3D CAD design and modeling
- Electrical and physical engineering: weight/load balance, HVAC, ergonomics, layout
- Professional A/V and technology integration (switching, control, 4K, streaming)
- Mobile communications systems
- (LMR, VSAT, Ku, GPS, WiFi)
- HD DVR, camera systems, video surveillance and recording
- 3rd party Subject Matter Expert (SME) inspections and reporting
- New design or prototype specifications development and conceptual design
